Professional Summary

Data and Business Analyst with 3+ years of experience as a founding team member at EHE Data System. Worked on a client ETL automation project using AWS Glue, focusing on data validation and Power BI dashboard development while collaborating with developers throughout delivery. Independently developed a corrective hybrid RAG application for answering business questions across company documents and structured data.

Technical Skills

Programming and Data: Python, SQL, pandas, NumPy, PostgreSQL, MySQL
Generative AI: LangGraph, LangChain, Gemini, GPT/ChatGPT, RAG, BM25; Jev
Applications and Retrieval: Streamlit, FastAPI fundamentals, Pinecone, FAISS, LangSmith, DeepEval
ML, DL and Analytics: scikit-learn, TensorFlow, ML/DL fundamentals, TF-IDF, Power BI, Tableau, Excel
Cloud and Development: AWS RDS, Git, GitHub, Codex, Docker fundamentals

Selected AI Projects

RGD Tech Enterprise Hybrid RAG
Python | LangGraph | Gemini | Pinecone | PostgreSQL on AWS RDS | Streamlit

- Built a Streamlit assistant that routes questions to PDF retrieval, Text-to-SQL, or both, combines evidence, and returns answers with source citations.
- Indexed 105 PDF chunks in both dense and BM25 Pinecone indexes; fused results with reciprocal rank fusion and reranked them with a CrossEncoder.
- Applied support/admin access filtering before context assembly and used role-specific runtime database connections separate from setup credentials.
- Implemented SQL validation, conversation checkpoints, and evidence checks, with up to two corrective retrieval attempts for hybrid queries.

LangGraph Tool Using Chatbot
LangGraph | Gemini | Streamlit | LangSmith

- Built a chatbot with search and calculator tools, streamed responses in Streamlit, and inspected execution traces in LangSmith.

Spotify Song Recommender
Python | TF-IDF | FAISS | Streamlit

- Created a content-based recommender for approximately 114,000 songs using TF-IDF and normalized FAISS similarity search; returned five recommendations through a Streamlit interface.

Professional Experience

EHE Data System | Nagpur, Maharashtra Dec 2022 - Present
Data and Business Analyst | Founding Team Member

- Worked directly with founders to define data and software service offerings, gather client requirements, and scope project deliverables.
- Translated business needs into functional requirements and coordinated with developers through implementation and client handover.
- Performed data validation and developed Power BI dashboards for a client's AWS Glue ETL automation project, collaborating across requirements gathering, pipeline development, and project delivery.
- Coordinated project timelines, stakeholder updates, and deliverable reviews; identified repetitive reporting tasks suitable for automation.

Education and Certification

MBA in Marketing | Gautam Buddha University | 2021
BTech in Food Processing and Technology | Gautam Buddha University | 2019
Professional Certificate Course in Data Analytics and Generative AI | IIT Kanpur | Dec 2025
